

M&A: SATISCO ACQUIRES THE BUSINESS OPERATIONS OF HUMANTECH PARTNERS

Luxembourg, May 15, 2025 – Satisco, a leader in the data integration market, announces the acquisition of the business operations of HumanTech Partners, a consulting firm specialized in Data Management and Modern Workplace.

A STRATEGIC STEP TOWARD BELGIAN-LUXEMBOURG LEADERSHIP IN DATA MANAGEMENT

HumanTech, recognized for its expertise in data valorization, supports its clients in France and Luxembourg in improving the quality, governance, and—above all—the strategic use of their data. This acquisition fully aligns with Satisco's strategy to enhance its "Data Synchronicity" offering.

«We are now in a position to offer a comprehensive range of services combining our historical expertise with innovative solutions to tackle the key challenges of data management,» explains Alain Kunnen, founder and CEO of Satisco.

Thanks to this business acquisition, Satisco strengthens its position in the following areas:

- Data integration and exchange
- Improvement of data quality and reliability
- Deployment of governance and security strategies
- Implementation of Business Intelligence (BI) and Generative AI (GenAI) solutions

A STRENGTHENED VISION, DRIVEN BY COMPLEMENTARY EXPERTISE

Elodie Trojanowski, CEO of HumanTech Partners, joins Satisco as **Head of Data Strategy**.

«Thanks to a team of experts in integration, architecture, and data transformation, we offer companies modular solutions that are perfectly tailored to their challenges. All CDOs, especially in regulated sectors such as banking, understand the importance of harmonizing their data stack: reduced operational costs, improved governance, and enhanced security.» — Elodie Trojanowski, Head of Data Strategy, Satisco

LEVERAGING DATA THROUGH A STRONG PARTNER ECOSYSTEM

Already a partner of **DataBricks** with native integration on Microsoft Azure), Satisco aims to strengthen its presence in the **Modern Data Stacks** ecosystem through upcoming partnerships with **Snowflake** and **Qlik**. long-standing **IBM** partner since 2005, Satisco is also joining the Microsoft expert community, thanks to its recognized MVP (Most Valuable Professional) expertise—particularly in data governance tools.

«Starting in September, we will launch exclusive training sessions for executives. The goal: to present concrete use cases around Copilot, assess costs and ROI, and highlight the importance of governance in a transition toward AI,» adds Alain Kunnen.

SATISCO & AXWAY: A PARTNERSHIP SERVING HYBRID ARCHITECTURES

Patrick Luc, Country Manager Luxembourg, explains: «This partnership, launched at the end of 2024, responds to the needs of our clients who still operate monolithic architectures on-premise. Axway offers hybrid and cloud-first solutions that are perfectly aligned with API-first and event-driven strategies. Our teams now master both environments, ensuring optimal support.»

THE DATA SYNCHRONICITY OFFERING: MEETING THE CHALLENGE OF DATA VOLUME

This business acquisition is part of the ongoing **Data Synchronicity** strategy, unveiled in June 2024. «Data volumes are exploding, and real-time exchanges are intensifying, while many companies are still relying on systems that are decades old. These tools are no longer suitable. Our mission is to deliver comprehensive and sustainable solutions to meet this challenge,» said Alain Kunnen on BFM Business last November.

ABOUT SATISCO

Present in Belgium, Luxembourg, and France, **Satisco** has a team of 70 employees. Since 2015, the company has been part of the international **Alan Allman Associates** ecosystem.

Founded in 2009, Alan Allman Associates brings together around fifteen operational brands that are experts in strategy and digital transformation, offering a comprehensive range of services from upstream consulting to project delivery.

The mission of Alan Allman Associates is to shape an ambitious, inclusive, and sustainable future by supporting its clients and its 3,300 consultants in tackling tomorrow's high-tech challenges, including cloud, data, cybersecurity, AI, and RPA.
